Logic behind PY2018 Provider Type-NPI Pools

1. Start with previous year's finalized Provider Type- NPI pools
2. Download the latest NPI Registry data for use
3. Look for new NPI's reported within the Federal NA templates for PY2017, and based on associated taxonomy in the latest NPI registry data, throw them into appropriate Provider type bucket.
4. Pull in Dental and Pharmacy providers from the Federal NA templates and use the same logic detailed in 3. above
5. From the pools remove providers marked as deactivated within the NPI registry
6. Get additional dead/disqualified NPI lists if possible to further cleanse pools. (This has not happened yet. We have to explore for reliable data sources)
7. Release Provider Type-NPI lists to the issuer community for final PY2018 cleanup

- Creation of "Initial PY2018 Provider Type-NPI list"

Discussion of Industry feedback -1

- Elimination of providers from the *Provider Type-NPI pool* for non-bordering counties
- Feedback on Provider Type-NPI pool using taxonomy (Aren't "C bucket" groupings enough?)
- Average distance calculations using 0.5% of County population

Discussion of Industry feedback -2

- Effect of Rural & Non-Rural designations
(Applies to ratio as well as time/distance)
- Acute care bed ratio (Required)

Discussion of Industry feedback -3

- Industry seeks definition of ECP Providers and Facilities required. (AID: Use CMS/CCIIO data)
- Provider directory review
 - AID's suggestion on sharing provider location
 - Review of machine readable online provider directories
- Issue of multiple specialty hospitals having only one taxonomic classification
